

Second Sight[®] Medical Products, Inc.

Helping the blind to see again

October 2009

Making a difference

Argus I

Argus II

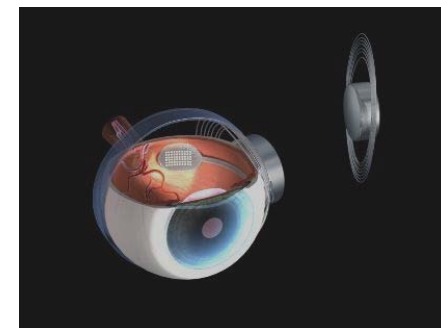

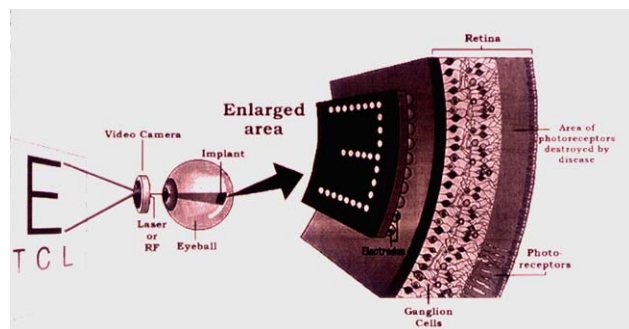

Retinal Prosthesis

Class III Active Implantable

- Uses electrical stimulation to bypass defective photoreceptors and stimulate remaining viable retinal cells.
- Image data from an external camera is wirelessly transmitted to the implant which stimulates electrodes in an array on the retina to produce formed vision.
- Clinical Indication = Outer retinal degenerative diseases
 - » Retinitis Pigmentosa
 - » Dry Age Related Macular Degeneration
